## Work Experience

### Google

USA/Japan/Canada

*Software Engineer - Google Cloud*

*Jan 2022 - Apr 2023*

- Designed and built Terraform and Kubernetes configurations, release pipeline, and probes for single-tenant GKE clusters.
- Drove decision to migrate Cloud source-control product from GCP VMs to GKE, reducing the work required for the eventual public release by 3+ eng months.

*Software Engineer - Android Platform*

*Mar 2020 - Jan 2022*

- Created new configuration system and migrated existing test definitions, resulting in an over 10x reduction in test definition LOC.
- Designed and built performance testing suite for Android platform modules, catching performance regressions much earlier in the development lifecycle.

*Software Engineer, Tools and Infrastructure - Android Google Maps*

*Jan 2014 - Mar 2020*

- Lead team tasked with improving developer velocity. We significantly improved test flakiness and test performance, reducing wall time of code submissions from 45 minutes to under 20 minutes. Resulting in 6+ eng-months of waiting time saved per year.
- Refactored build configurations for Android Google Maps to improve readability and build performance, reducing average wall time of incremental builds by approximately 5 minutes.
- Designed and built conformance test suite and infrastructure for Android Auto which was shipped to OEMs for verification of their implementation in vehicles.
